How does it work?

1. Visit the site
 - a. The user arrives at the design app's homepage.
2. Select header font
 - a. The user chooses a font style for headings.
3. Select paragraph font
 - a. The user selects a complementary font for body text.
4. Choose neutral colors
 - a. The user defines their neutral color palette (e.g., background color, text color).
5. Pick brand colors
 - a. The user selects up to three core brand colors to represent their identity.
6. (Optional) Set status colors
 - a. The user may define status colors (e.g., success, warning, error).
7. (Future option) Logo
 - a. User uploads their company logo
8. Submit selections
 - a. The user finalizes their choices and submits the configuration.
9. Preview results
 - a. The system generates a live preview, showing both mobile and desktop views, along with a contrast checker for accessibility.
10. Share results
 - a. The user has the option to share their configuration via a link for collaboration or review.
